## Unique Exhibit Planned World's Fair New York

Completion of plans for one of the most unique exhibits of the New York World's Fair was announced last week by the Palm Beach County World's Fair Authority.

In a joint statement, County Commission Chairman E. F. Van Kessel, chairman of the Authority, and Karleton Wulf, Authority Finance chairman and Vice President of the Bank of Palm Beach and Trust Co., for the first time released details of the county's combined "space machine" and automated "push button" tourist guide which will feature the county's exhibit in the Florida Building of the New York World's Fair, opening next April.

Describing the county exhibit as "one which will stand alone in its uniqueness and effectiveness," Van Kessel said that an expected 18 million visitors annually to the Florida Building at the Fair will have an opportunity to "see and use" the space machine and the tourist guide over the two year tenure of the Fair.

The only moving exhibit planned for the Florida Building, Palm Beach County's "Ride in Orbit" show will provide visitors a ride in sound-wired plastic capsules around a huge, tilted bowl. While in "orbit", a series of large colored transparencies will be revealed one at a time through directional polaroid glass. A special sound tape will be used to describe to the "captive viewers" in each capsule the scene being flashed on the opposite side of the big bowl as the capsules rotate.

## Lampi Is Honored By Pahokee Lions

Robert O. Lampi, director of the Pahokee High School Band since 1940, was honored Tuesday by the Pahokee Lions club when that organization marked his 23 years of service with an "Appreciation Day." Pahokee Mayor Duncan Padgett was the originator of the idea that culminated in an unusual program with many visitors present to pay homage to Mr. Lampi. Long-time Resident Paul Rardin was the invited speaker for the occasion and he traced the band's history from its inception until this fall when the musical group again won superior ratings in contests. First person introduced by Mr. Rardin was Mrs. Mary Lampi of Eagle Lake, Michigan, mother of the band director. Rardin also introduced Mrs. Ilmae Lampi, wife of Mr. Lampi.

Jimmy Vann of the Lions club introduced the visitors and the mayor introduced folks at the head table. The hall was delightfully decorated and the mayor gave credit for that to Mrs. Lloyd Hundley.

It was pointed out by the speaker that Mr. Lampi came to Pahokee from Newport Richey, Florida, in 1940 and has successfully directed the PHS band since that date. He has been an ardent civic worker, a member of the Pahokee Rotary club, pianist for the Elks Lodge for 16 years and has received a great deal of national publicity brought about by the continued success of his direction of the PHS musical group.

The Lampis have two children, Sandra and Buddy who are students at the University of Miami where they are making their mark in displaying their musical talents.

It was mentioned in passing by the speaker that Mr. Lampi's starting salary 23 years ago was \$90 per month.

### Doyle Conner Will Seek Reelection Ag Commissioner

TALLAHASSEE — Florida Commissioner of Agriculture Doyle Conner today announced that he would be a candidate for re-election in 1964. He cited his record in office as his platform.

Conner pointed out there had been significant developments in the fields of agriculture and consumer protection during his first three years in office, and that the Department of Agriculture had been modernized to reduce costs of operation.

"Since 1960, the Department has carried on successful eradication programs against screw-worms and the Mediterranean fruit fly," Conner said. "We have also initiated programs to combat hog cholera, Mexican fruit flies and fire ants."

Conner pointed out that he had also led a successful fight for equitable taxation of Florida farmland, and had created a marketing division within the Department to provide assistance to growers in marketing their products.

"Although there has been little publicity on our services to the consumer, we have strengthened and consolidated a number of major inspection services," he said.

"By tightening and strictly enforcing regulations we have been able to halt the sale of unsafe foods, curtail the use of unsafe pesticides and improve standards in all other areas under our jurisdiction," Conner stated.

A veteran office holder, Conner was first elected to the Florida House of Representatives at the age of 21, while a student at the University of Florida. He served five terms, and was elected Speaker of the House in 1955.

He was named one of the Ten Outstanding Young Men in the Nation in 1960 by the U. S. Junior Chamber of Commerce, and served as both state and national president of Future Farmers of America when in school.

### March Of Dimes Is Headed By Dr. V. D. Stone

Acceptance by a number of community leaders of key assignments in the January March of Dimes was announced this week by Dr. V. D. Stone, chairman of the Palm Beach County Chapter, The National Foundation.

Many of the volunteer leaders, Dr. Stone said, are members of the chapter's board of directors who are giving stepped up attention to the coming campaign.

The directors group includes Mrs. Jane B. Evans, Belle Glade, whose top responsibility will be coordination of the direct mail appeal throughout the Glades section.

The mailers, Mrs. Evans said, will be one of the principal fund raising efforts this year. Other activities will include the annual Mothers March the last week in January and distribution of coin collectors throughout the county.

Funds raised during the March of Dimes will be used to help fight birth defects and arthritis and to continue the care of long term polio patients.

Mrs. Evans noted that great strides have already been made in the five years since the March of Dimes first directed its attention against two major health problems, following the victory over polio.

The March of Dimes operation more than 70 treatment centers for care and study of birth defects and for aid of arthritis victims. In addition, \$5 million in March of Dimes grants now support scientific research programs aimed at control of birth defects and arthritis.

"The American people," Mrs. Evans said, "have come to expect success from the March of Dimes. Their continued support this January will make possible even greater victories over disease and disability."

### The Farm Front

by  
Doyle Canner  
Commissioner  
Florida  
Department of Agriculture

There are more possibilities in our contacts with Russia than cultural exchanges or sales of wheat.

The first Americans permitted to explore for plants in Soviet Russia since 1929 have returned recently with propagation stocks of many fruits potentially valuable to U. S. Agriculture.

The U. S. Department of Agriculture reports our American team found a green seedless grape variety, recently developed by the Russians, that produces table fruit much larger and with crispier flesh than anything now grown in this country.

The USDA men were told Russia has 3 million acres in grape cultivation compared with only one-sixth of that area in our major producing states, California and Arizona.

Incidentally, the Russians said they hope to encourage consumption of more wine and less vodka. Maybe they'll get someplace with that idea. But as I recall it, the much publicized campaign of several years ago to persuade the French people to drink more milk and less wine was something of a bust.

According to trade reports, the new concentrate is being distributed on a national basis.

A recent editorial in Produce News urges the potato industry to wake up and take action to suppress unfair advertising by a big food manufacturer.

It appears that a certain brand of noodles is being touted on TV with statements that potatoes are habit-forming. Get rid of the potato habit, the audience is told, and start eating noodles.

That reminds me of the advertising slogan of some years ago that advised listeners to "Reach for a Lucky instead of a sweet." It had the candy industry up in arms and eventually that particular slogan was abandoned.

Speaking of sweets, an unusual situation has developed in sugar which could cause a tight situation in U. S. supplies next year.

We've severed diplomatic relations with the Dominican Republic which has been supplying us with about a million tons of sugar a year. But we can't import from that source so long as we are on the outs with the Dominicans. In the meantime, the world supply is still a couple of million tons less than demand.

It looks like sugar will be making the news again in 1964.

The U. S. Chamber of Commerce questions the desirability of an increasing population in this action.

Many economists and businessmen think it's O. K., the Chamber notes—more people mean larger markets and more business. "It may also mean, however, more unproductive people," the Chamber points out, and larger relief rolls, crowded hospitals and institutions, more unemployment and crime, etc.

Its conclusion: Unless we are ready to devote more of our resources to meet increasing social and economic needs, "population increases may not be beneficial."

## Haydon Burns For Florida Governor

Haydon Burns, a candidate for governor, a native of Louisville, Kentucky, born March 17, 1912, has lived in Jacksonville since early childhood. Educated in Duval County public school system, he later attended Babson College at Babson Park, Massachusetts. He is a member of the University of Florida Alumni Association, and an Honorary Member of Florida Chapter of Phi Sigma Kappa, Sigma Phi Epsilon, and Alpha Kappa Psi.

A public relations and business consultant for many years, Burns first entered politics in 1949, when he was elected overwhelmingly Mayor of Jacksonville. Re-elected four times since as Mayor-Commissioner, he has always achieved first primary victories and has every time polled more votes than any other candidate on the entire ballot. He is the first Mayor of Jacksonville to have been elected for five consecutive terms to that office.

During his administration, the City of Jacksonville has enjoyed the greatest period of progress in its history. The "Jacksonville Story" has become known throughout the United States and many groups of community and political leaders from other cities, both in Florida and from other states, visit Jacksonville frequently to see Jacksonville's remarkable re-development program at first hand and to learn how it has been accomplished. In all things, Burns has always worked closely with other public officials, chamber of commerce groups, and private enterprise, and has provided drive and leadership for the community in bringing about some \$250,000,000 in redevelopment and renewal, all of which has been accomplished through a very close cooperative effort by private enterprise and local governmental agencies without any Federal funds.

## Christian Science Group Of Canal Point

The virgin birth of Christ Jesus will be explained in this Sunday's Bible Lesson at all Christian Science churches.

Readings from the Bible will include the angel's message to Mary: "The Holy Ghost shall come upon thee, and the power of the Highest shall overshadow thee: therefore also that holy thing which shall be born of thee shall be called the Son of God" (Luke 1:35).

From the Christian Science textbook, these lines will be read: "The illumination of Mary's spiritual sense put to silence material law and its order of generation, and brought forth her child by the revelation of Truth, demonstrating God as the Father of men" (Science and Health with Key to the Scriptures by Mary Baker Eddy, p. 29).

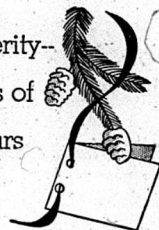

The Lesson-Sermon is entitled: "Is the Universe, Including Man, Evolved by Atomic Force?"

### Sending Cards Is Old Holiday Tradition

The custom of sending Christmas cards has grown so popular through the years that each year an average of one and one-half billion cards are mailed.

Some historians suggest that the idea of sending Christmas cards originated with school boys away from home, who wrote their letters on fancy paper and in fancy writing.

William Egley sent out a Christmas greeting on a fancy card in 1842 which showed his artistic and engraving talent. The card carried the message, "A Merry Christmas and Happy New Year."

In 1846, Henry Cole, a middle class Englishman, sent Christmas cards which depicted a Victorian family gathered at the festive board and which carried the message "A Merry Christmas and a Happy New Year to You."

The cards brought fame and popularity to Henry Cole, but it was two decades before Christmas cards were sold generally.
